**Artwork Digitization and Printing** by AirClix.

Digitize your fine artwork and sell your replicas. Artwork reproductions are produced using precise color management and high end printers with archive quality inks and papers. All work completed in-house.

16 x 20" oil painting by **Ebru Aydin** (original on left)  
Replica printed on Epson Canvas Satin Natural and stretched on 0.75" wooden bars.

**Color matching**

True color representation starts with calibrated scanners, and monitors. We use custom printer/paper profiles to accurately reproduce colors, shadow detail and smooth tonal transitions. Even our room lighting has a high color rendering index for true color artwork views.

## Digitization:

Maximum size of 36 x 48" can be digitized. Artwork scanned at 300ppi resolution by default. Higher resolution available on request.

Digital images are color matched, printed on Epson proofing paper and compared with originals to confirm accurate color reproduction. Full size printing can commence immediately or on a later date. Image files are available to clients.

Digitization (Pricing includes color matching)	
~12 x 12"	\$25.00
~16 x 20"	\$30.00

## Hard Proofing Details:

Digital images are printed on 5 x 7" proofing paper and used to compare with the original. Any corrections to the digital file are completed at this point. If only digitization is requested, the client can keep a final 5 x 7" proof to confirm print colors match the original artwork.

If printing of the artwork is requested on fine art paper or canvas then another hard proof is printed on clients paper of choice. Color of the proof is again confirmed with the original artwork.

Printing preparation continues to confirm printing size, and to add borders (mirrored, white or black) for 0.75" or 1.5" stretcher bars
